

*Folsom Boulevard
Complete Street Master Plan
Project Open House Meeting*
-Watt Avenue to Bradshaw Road
-Hazel Avenue East to County/City Boundary

DECEMBER 2015

Dear Business, Property Owner or Resident:

The Sacramento County Department of Transportation (SACDOT) is developing a **Complete Street Master Plan** (Plan) for Folsom Boulevard from Watt Avenue to Bradshaw Road and Hazel Avenue to the County/City boundary. These portions of Folsom Boulevard are in the Sacramento County unincorporated area. The development of a “complete street” for Folsom Boulevard will benefit all roadway users: motorists, pedestrians, bicyclists and transit.

We are holding a project open house to provide information about the project and to discuss ideas for potential pedestrian, bicycle and roadway improvements for these stretches of Folsom Boulevard. Additional information about the project is included on the back page of this invitation.

We encourage you to attend the open house to learn more about the project and to share with us your thoughts on a vision for Folsom Boulevard.

Sincerely,

Michael J. Penrose, Director
Department of Transportation

**You're Invited to Attend a
Project Open House**

Date: Wednesday, December 16

Time: 6:30 to 8 p.m.

**Location: Rancho Cordova Library,
9845 Folsom Boulevard**

Rob Leonard, Chief Deputy County Executive
Michael J. Penrose, Director - SACDOT

Folsom Boulevard Complete Street Master Plan

LEADING THE WAY TO GREATER MOBILITY

Project Background: The Plan will identify future design guidelines for roadway segments and intersections and will emphasize “Complete Street” ideals that accommodate sidewalks, bike lanes, medians, crossings, bus turnouts, lighting, landscaping and streetscape amenities. The Plan will identify sustainable features including energy efficient street lighting, low impact development (LID) green-scape and green-street elements as well as other improvements to enhance pedestrian and cyclist safety and health while benefiting the community’s quality of life.

Project Components: 1) With the aid of the community, develop a multi-modal complete street master plan. 2) Prepare construction documents and plans for the future implementation of master plan projects.

Complete Street Definition: Complete Streets are streets for everyone. They are designed to enable safe access for all users, including pedestrians, bicyclists, motorists and transit riders of all ages and abilities.

Project Funding: Project funding is being provided by a Community Based Transportation Planning grant from the California Department of Transportation (Caltrans).

Special Accommodations: Individuals requiring any accommodations — including but not limited to sign language interpreter, assistive listening devices, alternate formats of documents, etc. — are requested to contact Ron Vicari, Principal Civil Engineer at 916-874-5164 (CA Relay Service 711) or by e-mail at vicarir@saccounty.net at least seven (7) days prior to the scheduled meeting.

Information: If you have questions or need more information about the project, please contact:
